THE BEAUTIFUL CAPES COLLECTION

Look Book II

There is a quiet drama in the way a cape moves. It gathers light in its folds, lets the artwork ripple and turn, and reveals a different detail with every breath. In this volume, jewel tones and luminous metallics flow across black and midnight grounds, glowing against the cool steel of the chair and the shimmer of the city beyond.

Nothing here is accidental. The palette is deliberate, the finish polished, and the scale generous, so that each cape reads from across a room and rewards a closer look. It is wearable art in its most confident form.
